Name: TODO
Course: CSCI 312 Principles of Programming Languages
Assignment Deadline: February 16, 2026

Question 1

Replace the TODO marker with the name of the corresponding directory:

1. **TODO** stores transient files.
2. **TODO** contains all the programs used by regular users.
3. **TODO** is where each user is given a directory.
4. **TODO** is where data that is likely to change is stored.
5. **TODO** contains shared data used by programs in `/usr/bin`.
6. **TODO** contains shared libraries for programs in `/usr/bin`.
7. **TODO** contains scripts that start services at boot time.
8. **TODO** is a virtual filesystem maintained by the kernel.
9. **TODO** is the home directory for the root account.
10. **TODO** contains shared library files used by core system programs.
11. **TODO** contains "system" programs.
12. **TODO** contains device nodes.
13. **TODO** is the root directory.
14. **TODO** is used to install optional software.
15. **TODO** contains the kernel and boot loader.
16. **TODO** contains log files.
17. **TODO** is where programs that are not included with your distribution yet intended for system-wide use are installed.
18. **TODO** contains programs for the system to run.
19. **TODO** contains executables installed by your distribution.

Question 2

What does Vim's dot command let us do? **TODO**

Question 3

LCL p. 79 says "Table 9-1 lists the file types you are most likely to see (there are other, less common types too)." What are two of these "less common types"?

1. **TODO**
2. **TODO**

Question 4

What does the `x` attribute for a directory allow? **TODO**

Question 5

What does the signal SIGINT do? **TODO**

Question 6

What does the signal SIGTSTP do? **TODO**

Question 7

Replace the TODO marker with the name of the corresponding environment variable:

1. **TODO** is the pathname of your home directory.
2. **TODO** defines the contents of your shell prompt.
3. **TODO** is the name of the program for text editing.
4. **TODO** is the name of your shell.
5. **TODO** is your username.
6. **TODO** is the name of the program for paging output.
7. **TODO** is the current working directory.
8. **TODO** is the name of your display.

Question 8

Vim is a modal editor. List four modes:

1. **TODO**
2. **TODO**
3. **TODO**
4. **TODO**

Question 9
